

NILE BASIN INITIATIVE
INITIATIVE DU BASSIN DU NIL

Key Note

Dr. Modathir Zaroug

Nile Water Use Opportunities for Development & Challenges of Climate Change

Food security

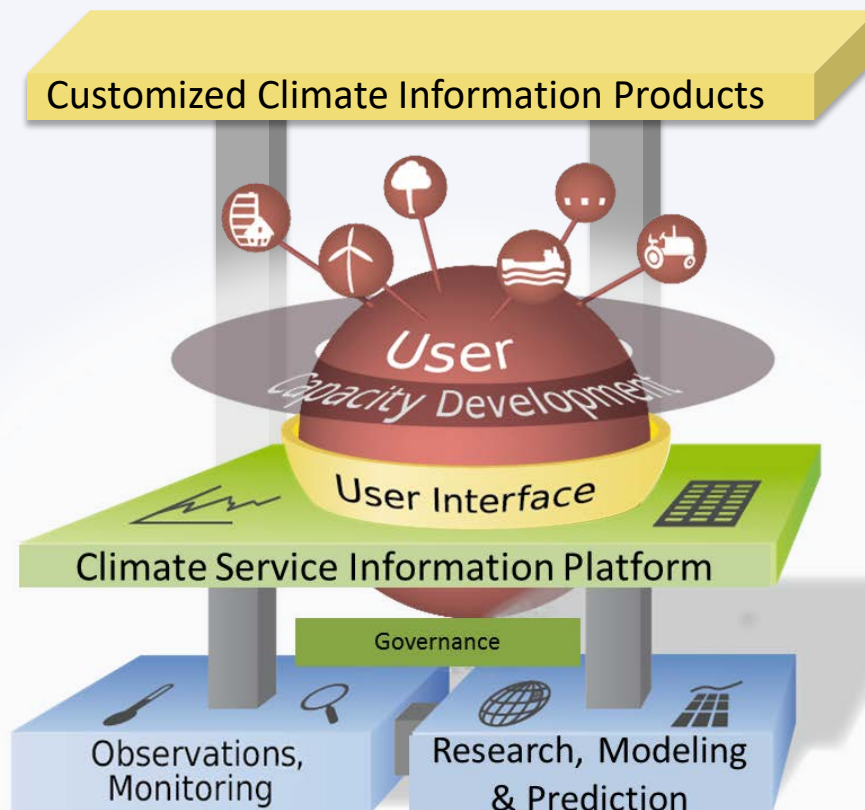

Electrification

Flood resilience

NBI's Framework for Climate Services

Climate Services Information System

Production and distribution system for climate data and information products that address user needs

Observation & Monitoring

The essential infrastructure for generating the necessary climate data

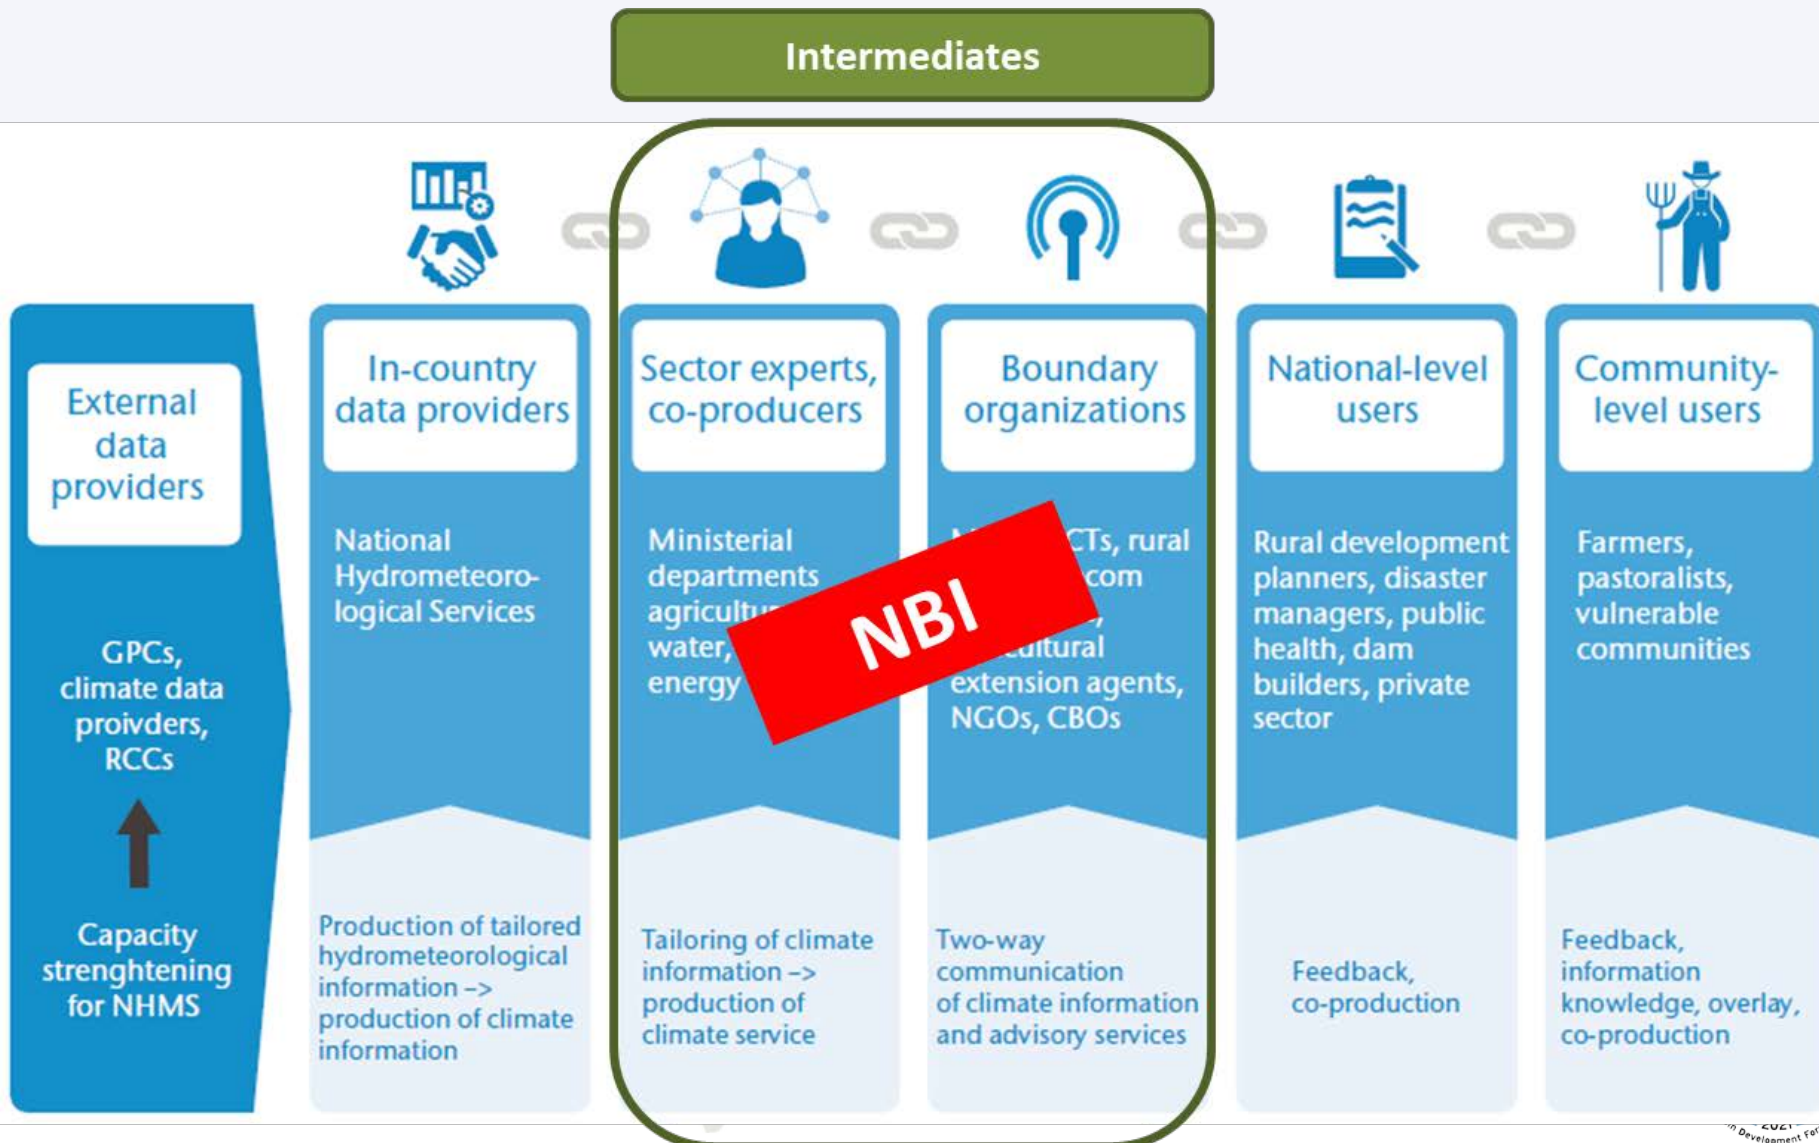

User Interface Platform

Users can make their voices heard & ensure that climate services are relevant to their needs

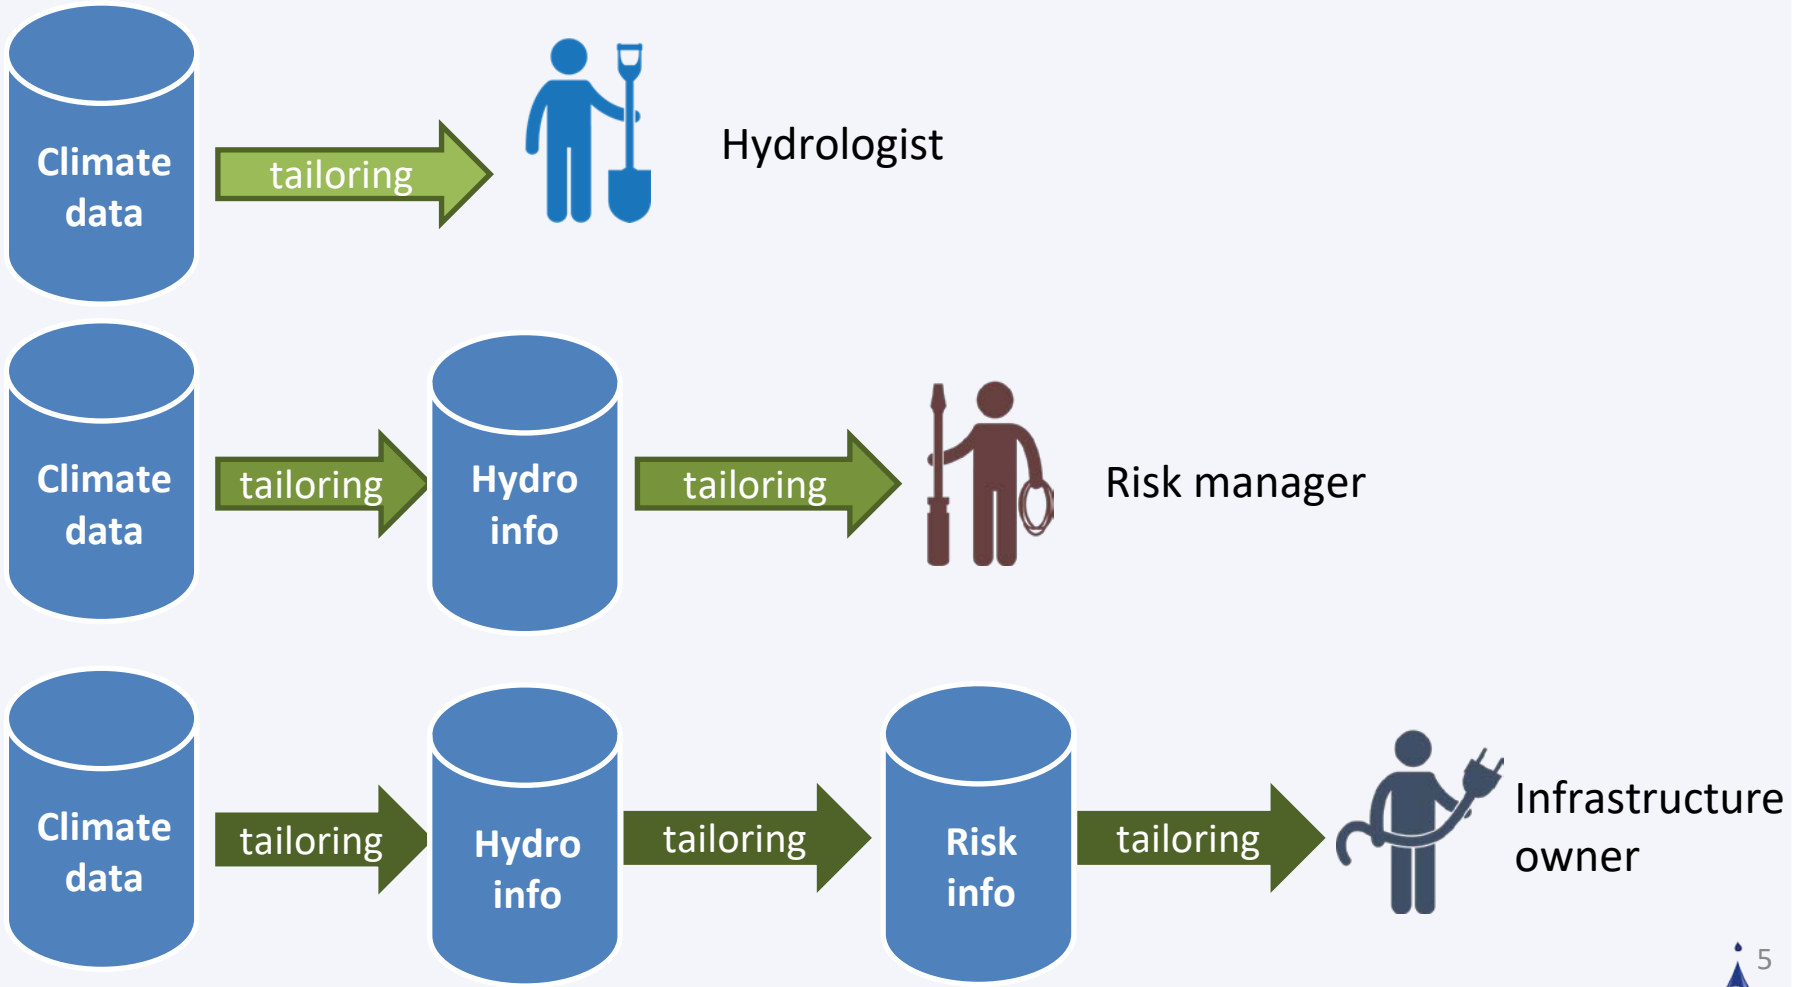

Research, Modeling & Prediction

To advance the science needed for improved climate services that meet user needs

NBI's Role in the Climate Service Value Chain

Scope of Climate Service Products

NBI's New Climate Service Knowledge Management Hub

Objectives of this webinar

- Showcasing what NBI has developed in the past three years to come up with the Climate Service Hub
- Demonstrate NBIs increasing role as a Climate Service provider
- Demonstrate how climate resilient infrastructure projects can be developed and supported
- Form a community of Practice for Climate Proofing of infrastructure investments: Invite participants to become a member of the CoP and register with the Climate Service Hub. During the next 6 months a series of trainings will be carried out to onboard on the Hub. This session is a sort of kick off to promote NBI's old and new services
